Profile

I am a driven junior Frontend Developer with a background in Finance and Mathematics. My analytical skills, honed through my academic pursuits, make me well-suited for roles that demand attention to detail and problem-solving abilities. Leveraging my financial background, I have successfully completed projects such as developing a landing page tailored for a bank's target audience of software developers. I am eager to apply my diverse skill set to maintain and update applications, contributing positively to any team.

Skills
